

Pragma Systems Joins the Microsoft Midrange Alliance Program

AUSTIN, Texas {April 28, 2009} [Pragma Systems](#), a leading provider of enterprise-class remote access and security software for Windows Server and Windows Mobile, it joined the Microsoft's Midrange Alliance Program (MAP). Pragma joins a group of independent software vendors (ISV) and system integrators that bridge the gap between midrange systems and the Windows platform.

The Midrange Alliance Program (MAP) partners use a variety of legacy modernization approaches and technologies with a focus and understanding that comes from years of supporting midrange systems. Pragma Systems' application delivery, secure connectivity and remote systems and task management software allows customers to migrate mission-critical applications to Windows platform from legacy midrange systems. [Pragma Fortress SSH Server](#) and [Pragma Telnet Server](#) give customers familiar, quick and reliable ways to deliver applications enterprise-wide from Windows Servers. Pragma's managed file transfers and systems management abilities provide a highly reliable end-to-end solution platform using Pragma software and Windows Servers. Pragma fully supports the Itanium architecture and all its products are available in native Itanium 64-bit binary form.

"We are extremely pleased to become a member of Microsoft's Midrange Alliance Computing Group," said Andrew Tull, vice president of sales and marketing for Pragma Systems. "Our participation in this program reinforces Pragma's strategic focus on providing customers with the widest range of secure connectivity solutions for their complex infrastructure systems. Over the past nineteen years, Pragma has been viewed as the source for seamless, cost effective, and reliable file transfer and remote management for more than 3,300 customers. Expanding our status with the Microsoft team enables Pragma to enhance awareness with Microsoft and within their customer base."

Pragma Fortress SSH is an enterprise grade SSH and SFTP server for the Windows Server operating system and both 64-bit and 32-bit versions are Certified for Windows Server 2008. Pragma Fortress SSH Server for Windows uses patent-pending technology to deliver the full power of advanced shells like Windows PowerShell. Pragma Telnet Server provides application delivery and remote access using Telnet protocol that is widely deployed in the supply chain, retail and warehouse-management industry. Pragma SSH ClientSuite and PocketVT provide the client access software for desktops and Windows Mobile devices. Using Pragma's product suite, customers have a reliable way to build or migrate enterprise class solutions. Leveraging Pragma's Itanium platform support, customers can build scalable solutions and attain high level midrange System i server class performance using Windows Servers.

About Pragma Systems, Inc.

Pragma Systems Inc. is a leading provider of enterprise class remote access and security software for Microsoft Windows & Windows Mobile platforms and is a Microsoft Gold Certified Partner. Pragma is an industry leader in Secure Shell and Telnet technology and offers the most popular SSH and Telnet servers for Windows and industrial grade SSH clients for desktops (Fortress ClientSuite) and handhelds (Pragma PocketVT). The company's end-to-end solutions of servers and clients on the desktop and mobile devices provide highly secure access to corporate supply chain, CRM, distribution and warehouse applications over wireless, Bluetooth, LAN, WAN and mobile networks. Pragma's software is deployed in the majority of Fortune 500 companies in the USA and over 2200 companies worldwide with millions of licensed nodes in over 65 countries.
