## **Pragma Telnet Server**

Remote Management. Remote Applications. Remote Control.

### Pragma Systems – Your Telnet Market Standard™

Pragma Systems offers the industry's most feature complete Telnet Server for use across any Windows environments.

#### Telnet with SSL Supported!

#### **Telnet Server Features**

- Manage Windows & Exchange servers with Microsoft PowerShell and alternative shells
- Secure Sockets Layer (SSL) support to ensure data security in telnet sessions
- Designed and optimized to enable RF or handheld
   units to access and run programs from Windows
- Supports all Microsoft Windows languages
- Supports over 1,000 concurrent telnet sessions
- Runs, manages and controls any character or console mode program, including edit, command, vi, emacs, pmon, net, ftp, lynx, perl and shells imported from Unix

#### **Centralized server management**

- Easy-to-use graphical or command line management programs that manage server and user settings and sessions
- Central enterprise configuration allows administrators to configure the system in one location and deploy the settings to all network servers

#### **Advanced usability features**

- Fully configurable environment
- Direct interaction between the user application and the client that exactly mimics server-side operation
- Automatic Wrap Technology helps character or console based programs that have difficulty running in a telnet or terminal session

- New "Named Pipes" functionality provides a programmatic interface for applications to communicate directly with client
- Allows history scroll-back and console application execution within the same session

#### Authentication and login features

- Automatic logon configuration
- NTLM authentication support
- Windows-integrated authentication using Active Directory

#### Features for RF handheld devices

- Server side timeout and heartbeat features for session cleanup
- Timing mark telnet option supported
- Full support for Motorola, Janam, LXE, PsionTeklogix, Intermec, Honeywell and others
- Custom user shell
- Automatic exit after running application
- Supports session reconnection
- Enhanced session clean-up
- Auto-login feature
- Works with any handheld client software, but performs optimally with Stay-Linked<sup>™</sup> clients

#### And more!

- IP filtering allows for limiting connections by IP address for added security
- Client-side print support
- SAPConsole support out of the box, no add-ons required

#### At a Glance

Pragma Telnet Server for Windows is an advanced and high-performance telnet server that lets you manage Windows computers and networks from

anywhere on the Internet. Intuitive and easy to use, Pragma Telnet Server contains all of the functionality you need to efficiently access, manage and use other systems remotely:

- Works with Windows PowerShell
- Telnet Server (Telnetd)
- Inet Server (Inetd)
- Remote Shell Server (rshd)
- Remote Execute Server (rexecd)
- Multiple management utilities and productivity-enhancing features

Pragma Telnet Server for Windows uses innovative, patent-pending technology to bring you the fastest, most scalable and feature-complete telnet server software for your remote network access applications. While it performs optimally with Pragma Fortress SSH Client Suite and Stay-Linked<sup>™</sup>, the software allows multiple users from any telnet client on any operating system to run console/character applications from Windows.

Unlike open source alternatives, which are not designed for enterprise use, Pragma Telnet Server works seamlessly out of the box, contains a robust feature set, scales to accommodate more than 1000 concurrent sessions and is customizable to meet your unique environmental and application needs.

**Connectivity with Telnet Protocol** 

Clients Running Pragma Client Suite, or other 3rd Party Telnet Client Servers Running Pragma Telnet Server or other Telnet Server

# Remote Connectivity... Done Right

#### Pragma Telnet Server Benefits

- Improves your productivity and saves you time – Pragma Telnet Server for Windows is packed with productivity-enhancing functionality that automates activities.
- Customizable, easy to use, and streamlined deployment – You can configure the software using a dialog window or command line program. It is also easy to customize, allowing user-defined login scripts and customizable login shells.
- Market-leading performance and scalability-Its efficient operation and superior design make Pragma Telnet Server highly scalable; it can support over 1000 concurrent sessions, while other telnet software typically supports only 30-40 sessions.
- **Reliable and proven** More than a decade of engineering design and input from thousands of users have perfected Pragma Telnet Server. Just install it, configure it to suit your preferences and you will never have to think about it again.

- Supports latest technology and broad range of platforms – Pragma Telnet Server runs in Windows 2019/2016/2012 R2/2012/2008 R2/2008/2003 servers & Windows 11/10/8/7/ Vista/XP clients and supports 32-bit and 64-bit processors.
- Flexible Telnet Client support It is optimized for use with handheld RF devices and includes special configuration and feature support for handheld clients and devices.
- Full-featured Pragma Telnet Server supports ANSI, VTXXX, and WYSE terminal emulation; fully supports both wired and wi-fi networks; and includes complete auditing and logging capabili ties.
- Best value Although open source alternatives do not cost money up front, the extra time you spend installing, maintaining, and using them far outweighs any initial "cost savings."

#### **Specifications**

- Runs in Windows 2019/2016/2012 R2/2012/2008 R2/2008/2003 servers and Windows 11/10/8/7/Vista/XP clients
- x86 32-bit, x64 64-bit
- 25 MB available hard disk space
- Fully supports any RFC compliant telnet client
- Microsoft NTLM authentication support
- Telnet, Telnet with SSL
- Stay-Linked<sup>™</sup> Ready
