Pragma Delivers Security and Remote Access to Rapidly Growing Chinese Market

Austin, Texas {May 25, 2012} – Pragma Systems, a leading provider of enterprise-class remote access and security software for Windows servers and mobile devices, is adding **Liangzuan China** and **Beijing Com&Lan System Tech** to their list of available value added reseller companies serving China. The addition of these resellers coincides with the increased volume of orders from China as the government is passing policies and campaigns for the integration of internet, broadcasting and communications networks as well as 'integration of informatization and industrialization'. Pragma's enterprise class software suite, Pragma FortressSSH Server, Pragma FortressSSH ClientSuite and Pragma TelnetServer, is now available for customers across Asia to order through Pragma's new partners.

"Pragma Systems has provided excellent customer service and prompt responses to our customers' questions. Furthermore, we continue to hear high praise for the Pragma solutions once they have been deployed to our customers, which is key to growing our business," said Lina Mao, Purchasing Manager, Liangzuan China.

"Pragma Systems offers the market's leading SSH and Telnet server and client solutions, so it was a natural decision for us to add their entire line of offerings to our widely expanding consumer base throughout China," said Ricki Li, Purchasing Manager, Beijing Com&Lan System Tech., Co., Ltd.

"Pragma Systems is pleased to be able to continue to grow our reseller base around the world. We are seeing significant growth in our overseas business and will continue to seek those reseller partners who are a fit for our solution," said Edith Myers, VP, Pragma Systems. "Both Beijing Com&Lan and Liangzuan China have been excellent partners for us as we continue to expand our presence into China."

According to CCID Consulting research, the industrial software market is growing at a rate of about 17.9% year-on-year. Helping to sustain market growth are modernizations in sectors such as e-government initiatives, education, healthcare and manufacturing. In industries like aerospace and aviation, over 90% of the products are developed using imported software. Managing and remotely accessing these systems requires secure and dependable software solutions, which is where the Pragma software solutions become an ingredient to a successful enterprise infrastructure.

Pragma's products allow enterprises remote access and management to systems and devices in their companies. Customers have reliable and secure solutions to utilize system administration (SSH), application delivery and secure encrypted file transfer (SFTP) or copy (SCP) throughout computing environments with Pragma's product suite.

Pragma FortressSSH is an enterprise grade secure shell (SSH), secure file transfer (SFTP) and secure copy (SCP) server for the Windows. Pragma TelnetServer delivers remote Windows command sessions to clients at their local computer. Pragma Telnet and SSH solutions are SAPConsole compliant and are widely used in supply chain and data warehousing deployment worldwide. Using Pragma software, customers can securely perform system administration, application delivery and encrypted file transfer throughout an enterprise needing mission-critical reliability.

About Pragma Systems
Pragma Systems Inc. is a leading provider of enterprise class remote access and secure file transfer software for Microsoft Windows platforms and is a Microsoft Gold Certified Partner. Pragma is an industry leader of Secure Shell (SSH), Telnet, SFTP and SCP technology. The company's end-to-end solutions comprising servers, desktop-clients and mobile-clients allows data-centers and enterprises to build highly secure infrastructure to access corporate supply chain, CRM, SAPConsole, distribution and warehouse applications over wired or wireless networks. Pragma's software is deployed in the majority of Fortune

500 companies in the USA and over 4000 companies worldwide with millions of licensed nodes. Visit www.pragmasys.com.
