

Pragma Systems Pricing

The Fortress and Telnet prices below are for machines with up to **8 CPU's (virtual processors)** unless otherwise noted. If you have more than 8 CPU's on your machine or require a different amount of client connections, please contact Pragma Systems.

You can see how many virtual processors your machine has by viewing the number of processors in Device Manager, or if you have an evaluation installed, by viewing the **About page in Pragma Management Programs -> Local Server Configuration**.
