Pragma Systems Products Now Available on GSA and NASA SEWP IV Schedules

Austin, Texas {February 8 , 2011} – Pragma Systems, a leading provider of enterprise-class remote access and security software for servers and mobile devices, announces that immixGroup, Inc. will now offer Pragma's SSH and Telnet servers and clients as part of GSA contract number GS-35F-0511T and NASA SEWP IV (Solutions for Enterprise Wide Procurement) contract number NNG07DA20B. immixGroup is a leading provider of technology products and services for the public sector. These organizations will have a reliable way to utilize secure system administration, application delivery and secure encrypted file transfer throughout computing environments utilizing standard SSH and Telnet protocols with Pragma's product suite spanning servers, desktops and mobile platforms.

The GSA Contract is a Government Wide Acquisition Contract (GWAC) which provides centralized procurement for the federal government, offering products, services, and facilities that federal agencies need to serve the public. GSA offers businesses the opportunity to sell over $500 billion dollars of products and services to federal agencies, along with state and local public sector agencies via GSA's cooperative purchasing agreement.

SEWP, also a GWAC Contract, is authorized by the U.S. Office of Management and Budget (OMB) and managed by the National Aeronautics and Space Administration (NASA). This contract offers a vast selection of advanced technology, including but not limited to, Windows based software and security solutions, computer systems and servers along with peripherals, network equipment and storage devices, to all Federal and their authorized contractors.

"We are very excited about partnering with Pragma Systems and supporting their strategy to increase their visibility and growth in the government sector," said Art Richer, president of immixGroup. "immixGroup offers our government customers the largest array of best-of-breed cyber security products and solutions in the industry. The addition of the Pragma Systems suite of products is another example of our commitment to helping the government achieve mission assurance."

"Pragma's partnership with immixGroup, one of the leading government solutions providers, and our availability on immixGroup's SEWP contract and GSA Schedule, continue to illustrate our focus on ensuring that all government customers can easily and readily utilize Pragma's leading solutions for their secure file transfer and connectivity needs," stated Andrew Tull, Pragma's vice president of sales and marketing.   "We look forward to continuing to build our business together with the immixGroup team."

Pragma Fortress SSH Server for Windows includes SSH/SFTP/SCP servers allowing secure system administration, application delivery and secure encrypted file transfer throughout IT environments. Pragma Telnet Server provides application delivery and remote access using Telnet and TelnetSSL. Pragma SSH ClientSuite and PocketVT provide the client access software for desktops, tablets and Windows Mobile devices.

About Pragma Systems, Inc.

Pragma Systems Inc. is a leading provider of enterprise class remote access and secure file transfer software for Microsoft Windows & Windows Mobile platforms and is a Microsoft Gold Certified Partner. Pragma is an industry leader of Secure Shell and Telnet/TelnetSSL technology. The company's end-to-end solutions comprising servers, desktop-clients and mobile-clients allows data-centers and enterprises to build highly secure infrastructure to access corporate supply chain, CRM, distribution and warehouse applications over wired or wireless networks. Pragma's software is deployed in the majority of Fortune 500 companies in the USA and over 4000 companies worldwide with millions of licensed nodes in 65 countries. Visit www.pragmasys.com.
