FOR RELEASE 8 a.m. CST JANUARY 24, 2008:

Pragma FortressSSH and Pragma TelnetServer Becomes Certified for Windows Vista
Pragma Systems Further Distinguishes Itself by Earning the Certified for Windows Vista Logo for Pragma FortressSSH Server and Pragma TelnetServer for Both 64-bit and 32-bit Operating Systems

AUSTIN, Texas {January 24, 2008} Pragma Systems, a leading provider of enterprise-class remote access and security software for Microsoft Windows and Windows Mobile today announced that its Pragma FortressSSH Server and Pragma TelnetServer products have earned the Certified for Windows Vista logo. Pragma Systems' FortressSSH Server 5.0 and Pragma TelnetServer 7.0, both containing patent-pending technology, recently became Certified for Windows Vista in both its 32-bit and 64-bit versions. Pragma's products allow end-to-end secure remote access and management to computers across an enterprise environment. Customers have a reliable way to utilize secure system administration, application delivery and secure encrypted file transfer throughout computing environments with Pragma's product suite spanning Windows-based servers and desktops and Windows Mobile-based platforms.

"Microsoft is pleased that Pragma Systems, Inc. has earned the Certified for Windows Vista software logo for their Pragma FortressSSH Server and Pragma TelnetServer," said Aseem Datar, product manager of Windows Client Product Management at Microsoft Corporation. "With this certification, Pragma Systems is letting their customers know that their product has met explicit standards of reliability and quality, and has been tested and proven to deliver a superior experience with a PC running Windows Vista."

"By earning the Certified for Windows Vista logo, Pragma is proving its leadership in the market for highly secure Windows-based communications. Customers come to us for high performance software that offers comprehensive,
