BlueStar to Carry Pragma FortressSSH Server
Software provides comprehensive security for enterprise customers.

Florence, KY—November 4, 2008—BlueStar, the leading innovator in solutions-based distribution for Auto ID, Point-of-Sale, Mobility, and RFID products, is now carrying Pragma's FortressSSH Server product line that secures customer networks against network intrusions, unauthorized data access, hacking, and virus and worm attacks.

Pragma Systems' FortressSSH Server product provides a comprehensive security framework for enterprise customers. Cryptography and high encryption are used to secure channels over which communication between servers and clients take place. [FortressSSH Server](#) is built with the widely used secure shell (SSH) protocol, and therefore is compatible with SSH servers and clients from other vendors in different operating systems.

“Pragma’s widely popular FortressSSH Server, ClientSuite, and TelnetServer products are now available across all Windows platforms of Windows Server 2008/2003/Vista/XP in 64-bit, 32-bit, or Itanium IA64, making us the only vendor to offer products on all architectures of Windows Editions,” says David Kulwin, CTO and co-founder of Pragma Systems. “We are delighted that BlueStar will now carry our flagship SSH product line,” says Kulwin.

FortressSSH Server offers: secure remote access to command shell and new Windows PowerShell; secure file upload/download through SFTP or SCP; port forwarding using a Software VPN; numerous management tools; authentication methods; and certificate/key management. It includes servers for Windows 2008/2003/Vista/XP and clients for Windows

2008/2003/Vista/XP and Windows Mobile/CE.

“BlueStar is excited to add Pragma and its enterprise security products to our product line-up. We look forward to educating our customers about the product line,” says BlueStar Director of Business Development, Dan Hahn.

About Pragma Systems, Inc.

Pragma Systems Inc. is a leading provider of enterprise class remote access and security software for Microsoft Windows & Windows Mobile platforms. Pragma is an industry leader in

Secure Shell and Telnet technology and offers the most popular SSH and TelnetServer for Windows. The company's end-to-end solutions of servers and clients on the desktop and mobile devices provide highly secure access to corporate supply chain, CRM, distribution, and warehouse applications over wireless, Bluetooth, LAN, WAN, and mobile networks.
