

Stay-Linked and Pragma Systems Forge Technology Partnership with Validated Solution Stack

Combines the Market's Leading Windows Telnet and SSH Server Software with the New Standard for Terminal Emulation and Device Management

TUSTIN, CA--(Marketwire – May 6, 2008) - Stay-Linked Corporation, the industry leader in host-based, thin client wireless terminal emulation and device management, today announced that it has added [Pragma Systems, Inc.](#) as a Stay-Linked Technology Partner. The new partnership is the result of the successful testing and validation of the companies two flagship software offerings functioning as a single combined solution stack for accessing host-based business applications. Pragma Systems will market and brand its [Telnet](#) and [SSH Server](#) software as Stay-Linked Validated™.

“Having a validated Telnet and SSH Server software component to partner with our thin client terminal emulation and device management software in Windows host environments adds a lot of value,” says David Griffith, president of Stay-Linked. “Stay-Linked and Pragma Systems are both recognized market leaders with solutions that offer tremendous benefits beyond typical default offerings. As a result of this partnership, we can now recommend Pragma Systems server technologies to our partners and end-users as a standardized compliment to Stay-Linked.”

Adds Quamrul Mina, CEO for Pragma Systems, “A significant and growing number of end-user customers already use our two software solutions together and are experiencing excellent results, so we see this technology partnership as a natural extension of the success we’re already achieving. The market will respond very favorably to us partnering in this way. Our partners and customers can deploy our two offerings together with total confidence knowing that this best of breed solution stack has been tested and certified using the best practices of our two companies.” Additional information regarding Stay-Linked can be found at www.stay-linked.com. About Stay-Linked

Stay-Linked Corporation began developing The New Standard™ for managing wireless terminal emulation sessions and devices in 2001. Built from the ground up for the wireless world, Stay-Linked debuted in 2002 as the first thin client terminal emulation solution—a marked deviation from existing device-side technologies that evolved from the wired terminal model. Utilizing the proprietary Client2Host™ architecture, Stay-Linked was the first host-based thin client terminal emulator; the first to provide true software-only session persistence; the first to provide a GUI Administrator console for emulation configuration and session control; and is still the only emulator with Advanced Terminal Session Management (ATSM).

About Pragma Systems Pragma Systems Inc. is a leading provider of enterprise class remote access and security software for Microsoft Windows & Windows Mobile platforms. Pragma is an industry leader in Secure Shell and Telnet technology and offers the most popular SSH and TelnetServer for Windows. The company's end-to-end solutions of servers and clients on the desktop and mobile devices provide highly secure access to corporate supply chain, CRM, distribution and warehouse applications over wireless, Bluetooth, LAN, WAN and mobile networks. Pragma's software is deployed in the majority of Fortune 500 companies in the USA and over 2700 companies worldwide with millions of licensed nodes in over 65 countries.
