

FOR RELEASE 8 a.m. CST JANUARY 27, 2009:

Pragma Fortress SSH Becomes Certified for Windows Server 2008

Pragma Distinguishes Itself by being the first SSH vendor Certified for Windows Server 2008 and Hyper-V

AUSTIN, Texas {January 27 2009} [Pragma Systems](#), a leading provider of enterprise-class remote access and security software for Windows Server and Windows Mobile, announced that its [Pragma Fortress SSH Server](#) has earned the dual logo status of Certified for Windows Server 2008 and Microsoft Hyper-V virtualization ready. VeriTest, an independent third party laboratory authorized by Microsoft Corp. for certifications, performed the extensive testing and certifications. Being Certified for Windows Server 2008 demonstrates that the software meets Microsoft's technical standards for best platform practices and is ready for mission critical environments. The Hyper-V designation indicates product readiness for Microsoft Hyper-V virtual server deployment.

"Products that are Certified for Windows Server 2008 have met explicit standards of security, stability, reliability and availability, and are ready for mission-critical environments.," said Ward Ralston, Group Product Manager of Windows Server at Microsoft Corp. "We are pleased that Pragma Systems' Fortress SSH Server is now Certified for Windows Server 2008 and takes advantage of the new technologies available in Windows Server 2008."

"By earning the Certified for Windows Server 2008 status and Hyper-V logo, Pragma is proving once again that it has the best Windows SSH solutions in the industry. Pragma's leadership in SSH technology and deep expertise in Windows programming is validated once again," said Quamrul Mina, CEO of Pragma Systems. "By achieving these Microsoft certifications, we feel confident that Pragma Fortress SSH Server will provide users of Windows Server 2008 with enhanced reliability, security, scalability and connectivity."

Pragma Fortress SSH is an enterprise grade SSH and SFTP server for the Windows Server operating system and both 64-bit and 32-bit versions of Pragma software have attained the certifications. Fortress SSH allows secure remote access and accelerated SFTP and SCP file transfer. Pragma Fortress SSH Server for Windows uses patent-pending technology to deliver secure, reliable server-side functionality needed to give authorized users protected access to your company's critical files and to transfer data. Fortress SSH also works great with Microsoft's new Windows PowerShell out-of-the box and is Certified for Windows Vista.

About Pragma Systems, Inc.

Pragma Systems Inc. is a leading provider of enterprise class remote access and security software for Microsoft Windows & Windows Mobile platforms and is a Microsoft Gold Certified Partner. Pragma is an industry leader in Secure Shell and Telnet technology and offers the most popular SSH and Telnet servers for Windows and industrial grade SSH clients for desktops (Fortress ClientSuite) and handhelds (Pragma PocketVT). The company's end-to-end solutions of servers and clients on the desktop and mobile devices provide highly secure access to corporate supply chain, CRM, distribution and warehouse applications over wireless, Bluetooth, LAN, WAN and mobile networks. Pragma's software is deployed in the majority of Fortune 500 companies in the USA and over 2200 companies worldwide with millions of licensed nodes in over 65 countries.
