

Pragma Releases Mobile SFTP and FTP Client for Secure File Transfer

Austin, TX {June 13, 2011} [Pragma Systems](#), a leading provider of enterprise-class remote access and security software for servers and mobile devices, introduces [Pragma Mobile FileMover](#) for Windows Mobile devices, smart phones and handhelds that are running Windows Mobile 6.0/5.0, Windows CE 5.0/4.x or PocketPC 2003. Mobile FileMover is an enterprise-class secure file transfer (SFTP) and file transfer (FTP) client for mobile and industrial handheld devices that provides government, financial services, healthcare and supply chain customers a reliable way to transfer large files to and from a remote SFTP or FTP server.

Mobile FileMover solves the security and access challenges that come with secure file transfers. It utilizes the encryption capabilities of SFTP or FTP over SSL, providing a reliable and secure method for transferring files. These files may represent customer data going to a field sales force, corporate briefings or presentations or represent other important financial, healthcare or personally identifiable data. With Mobile FileMover, users can access enterprise servers to upload and download necessary files to improve productivity and access for customers, partners or vendors 'on the go'. FileMover allows uploads or downloads of files of any size easily and efficiently across a wireless (4G, 3G, Wi-Fi), WAN, VPN or LAN network.

"Secure mobile access to company data and files are vital for professionals who require instant mobile access to any updated data," says Quamrul Mina, CEO of Pragma Systems. "FileMover greatly assists this process by allowing instant downloads or uploads of files securely with Pragma's FIPS certified security software."

Pragma Systems continues to enhance their mobile software offerings to meet a broad range of customer needs relating to fast and secure file transfers. When coupled with the FIPS 140-2 Certified security capabilities provided by Pragma's Secure Shell (SSH) server offering, Pragma FortressSSH, the solution provides a robust solution that solves many regulatory issues including PCI, HIPAA and Sarbanes-Oxley compliance.

Pragma Mobile FileMover features include:

- Upload of files from a mobile device
- Download of files to a mobile device
- Support of SFTP and FTP file transfer protocols
- Advanced encryption algorithms AES, TripleDES and Blowfish
- Password and certificate based authentication for secure user verification
- Works with any SFTP and FTP servers on any operating systems
- Auto login capability
- Auto sensing and adjustments for landscape or portrait mode

Pricing for Pragma PocketVT is US\$39 per client with discounts available for volume purchases. Download a free 14-day trial from <http://www.pragmasys.com/trynow.asp>.
